

Foundation for Prader-Willi Research Canada is proud to announce an easy way to help fund research!

Join the FPWR Canada Giving Program and help stop the endless hunger for children with Prader-Willi Syndrome.

Prader-Willi Syndrome is a life threatening medical disorder caused by a loss of the active genetic material on chromosome 15. This affects hormones, muscle tone, appetite, behaviour, cognition and learning, temperature regulation, pain intolerance, sleep patterns and much more.

But there is hope.

FOR LESS THAN A DOLLAR A DAY

you can help STOP the endless hunger for our kids. Your monthly support will fund research to find the answers.

Our kids deserve to Live Life FULL without the continuous thought and feeling of hunger.

It's easy to help with recurring donations:

- ➔ Choose an amount
- ➔ Fill in your information to charge the monthly amount through your PayPal account
- ➔ At the end of the year you will receive a tax receipt for the total amount donated
